

Abdul Hamid AL-Bayya'

Senior Software Engineer

ABOUT ME

Senior Software Engineer with 8+ years of experience building full-stack products across mobile (React Native), web (React), and backend (Node.js/TypeScript) platforms. Experienced in owning features end-to-end, from design through implementation, testing, and production deployment — in cloud-based (AWS) environments, with a strong focus on code quality and clear cross-functional communication.

EDUCATION

Management Information System

Politeknik Unggul LP3M

2013 - 2015

Computer Science

University of Pembangunan Panca Budi

2016 - 2018

LANGUAGES

English, Indonesian

CORE SKILLS

TypeScript, React Native, Node.js, AWS, GraphQL, REST API

WORK EXPERIENCE

Senior Software Engineer (Remote) — Nov 2024 - Present

Slyp Pty Ltd l Sydney, Australia

- Design, build, and maintain full-stack features across a loyalty/rewards platform spanning a React Native mobile app, a React web app, and multiple Node.js/TypeScript backend microservices.
- Own features end-to-end: from requirements clarification and technical spikes, through implementation, testing, code review, and production rollout.
- Build and evolve authentication and session-management flows (AWS Cognito, JWT issuance/refresh), balancing security with user experience.
- Design and maintain shared UI component/design-system libraries, ensuring consistency and preventing regressions through automated tests.
- Diagnose and resolve cross-platform compatibility issues (iOS/Android, multiple browsers) and production incidents, working from analytics/user reports back to root cause.
- Write and maintain automated test suites (unit, integration, end-to-end) to protect code quality as the codebase scales.
- Maintain CI/CD pipelines and deployment infrastructure to support frequent, reliable releases.
- Conduct code reviews, including AI-assisted review practices, to uphold code quality, security, and architectural consistency across a multi-repo codebase.
- Collaborate cross-functionally with product, design, and engineering stakeholders to scope work and clarify requirements.

Software Engineering Manager — Jul 2023 - Oct 2024

The Luxe Week l Bali, Indonesia

- Led and managed a team of software engineers to successfully deliver and launch a new software product on time and within budget.
- Oversaw the development and implementation of a new code review system, resulting in a 20% reduction in code errors and improved overall code quality.
- Collaborated with cross-functional teams to assess and prioritize product features, resulting in a 15% increase in customer satisfaction and retention.
- Implemented agile development methodology, resulting in a 20% increase in team productivity and efficiency
- Led the development of a new feature that increased user retention by 15%
- Successfully integrated new technologies into existing software systems, leading to improved functionality and user experience.
- Mentored and coached junior software engineers, resulting in the promotion and growth of team members within the company.
- Identified and resolved critical software bugs, minimizing downtime
- Successfully resolved multiple critical technical issues and challenges, resulting in improved product stability and customer satisfaction.
- Developed and executed training programs for team members to enhance their skills, resulting in a more versatile and skilled engineering team.
- Maintained effective communication and collaboration with cross-functional teams, resulting in the timely delivery of integrated and seamless products.

SKILLS

Programing Languages :
TypeScript, JavaScript, HTML/CSS, PHP

Frameworks & Runtimes :
React, React Native, Next.js, Angular, AngularJS, Vite, jQuery, Node.js, Express, NestJS, CodeIgniter 3, Strapi

UI Libraries & Styling:
Tailwind CSS, Chakra UI, Styled Components, Bootstrap

State Management & Data Fetching:
Redux Toolkit, Redux Saga, NgRx, TanStack Query, TanStack Router, Context API, React Navigation, Formik

Databases :
MySQL, PostgreSQL, SQL Server, MongoDB, TypeORM, Sequelize, Mongoose

Cloud & DevOps:
AWS Cognito, AWS S3, AWS DynamoDB, AWS SQS, AWS SNS, AWS RDS, AWS CloudFormation, AWS Amplify, AWS ECS, AWS EKS, AWS WAF, Amazon QuickSight, Docker, Kubernetes, Terraform, CI/CD

Version Control:
Git, GitHub, GitLab

Testing:
Jest, Vitest, Cypress, React Testing Library, Playwright

Tools & Practices:
GraphQL, Apollo Client, REST API, EagleEye, Gr4vy, Paragon, Stripe, Contentful, Visa, Mastercard, AJAX, PostHog, Figma, Jira, Confluence, Agile, Scrum, OOP, Design Patterns, SOLID Principles, Clean Code, Code Review, Problem Solving, Claude, Claude Code, GitHub Copilot, AI-assisted development

Personal Learning & Side Projects:
Dart, Flutter, Python, Django, Ruby, Ruby on Rails, Go, gRPC, Kotlin, Spring Boot, Web Application Security, Penetration Testing, Social Engineering, Kali Linux

Operating Systems:
Windows, Linux, macOS

Senior Full Stack Developer (Remote) May 2022 - May 2023

Juleb - Digital Pharma Company l Jeddah, Saudi Arabia

- Developed web modules.
- Upload source codes to Gitlab to be reviewed and merged to production.
- Bug fixing, add new features, etc .
- Built a React/Node.js web application, optimizing performance by reducing page load times.
- Developed a back-end API using Node.js and Nest.js Framework.
- Improved data delivery and system stability with the integration of GraphQL.
- Refactored legacy code for increased extensibility.
- Optimized front-end UI/UX by incorporating modern web technologies.

Full Stack Developer Dec 2019 - Feb 2022

PT Visi Globalindo Data Utama (A CRIF Company) l Jakarta, Indonesia

Main Task

- Created and implemented back-end and front-end solutions for client websites.
- Built web pages using HTML, CSS, JavaScript, and PHP.
- Developed RESTful API services for client apps.
- Applied modern web development techniques and technologies.
- Developed multi-tier web applications utilizing modern JavaScript and HTML frameworks.
- Developed and tested software applications using Git versioning.
- Implemented scalable server-side components to improve performance and navigate complex data structures.
- Developed a highly efficient and maintainable full stack architecture.
- Troubleshot complex bugs and implemented solutions.
- Implemented various client functionalities and features.
- Monitored system performance and resolved performance issues.
- Developed endpoints to integrate the front-end with the back-end.
- Created RESTful web services for a web application using Node.js.
- Developed and maintained multiple web applications.

Support Task

- Network monitoring and troubleshooting.
- Troubleshooting, maintaining and repairing computers, laptops and printers.
- Monthly network and other devices maintenance.
- Install hardware, software, and systems.

Backend Developer Oct 2018 - Sep 2019

PT Mitra Tekno Madani l Jakarta, Indonesia

- Developed high-quality logic and code for backend applications.
- Design, optimize and maintain database architecture.
- Implemented algorithmic solutions to complex problems.
- Refactored existing code to improve readability and performance.
- Optimized current systems and processes to make them more efficient.

IT Support Mar 2016 - Jul 2017

PT Perusahaan Listrik Negara (Persero) | Binjai, Indonesia

- Network monitoring and troubleshooting.
- Troubleshooting, maintaining and repairing computers, laptops and printers.
- Monthly network and other devices maintenance.
- Coordinating daily operations with the company's regional offices and other departments to ensure consistent service across the region.

Computer Technician May 2014 - Apr 2015

Simone Com | Medan, Indonesia

- Installed & configured new hardware components & software programs.
- Troubleshoot hardware and software issues.
- Resolved software problems.
- Diagnose system performance problems and provide necessary solutions.
- Install hardware, software, and systems.
